

AURORA KYB AGENT

Part of *aurora agent suite*,
powered by **Middesk**

Your team spends 250+ hours a month on manual KYB for every 5,000 applications. ⁽¹⁾ Aurora's KYB agent handles that verification, from legal name mismatches to inactive and dissolved entities, and drops what it finds into the LOS your team already uses.

features that will make your team happy

wait, not that one

➤ The application says Miller Equipment, and the state says Miller Equipment Holdings, LLC. The agent catches the mismatch before you re-paper a deal over a missing LLC.

trust, verified

➤ Findings above your confidence threshold get accepted automatically, and you set the threshold to match your own risk appetite.

show your work

➤ Every clearance comes with its reasoning and sources attached. When your examiner asks why, the answer's already in the file.

been there, checked that

➤ Every file gets checked against 400+ authoritative sources, from Secretary of State filings to federal watchlists.

still open for business

➤ The agent confirms the entity is active and in good standing with the state before the deal funds.

no tab left behind

➤ The updated Business Identity Report and every single finding drop into aurora on their own, and nobody has to copy a thing.

Make KYB the fastest part of the deal.
